

This is a #10 IMB Window Envelope
Width = 9 1/2, Height = 4 1/8

This white area is the standard printable area. If your artwork must be in or beyond the gray area, please consult with your sales representative as a different process may be needed.

This information is placed on the “Callouts and Safe Zones” layer which has been suppressed from output. Simply hide the “Callouts and Safe Zones” layer and place all artwork on the “Artwork” layer.

The inner red line shows the position of the actual window while the outer red line shows the minimum distance outside the window that should be void of any printed content.
